

Here are some printing tips from our parent volunteers:

- When purchasing lawn signs or posters online, images may need to be rotated or resized after uploading.
- This varies by printing company. Check that your image fills the space of the sign you are printing.
- Some vendors only allow ship-to-home for lawn signs. Shipping times and shipping charges may not be explained until you are checking out. Some vendors may take up to two weeks to ship.
- Comparison shopping in mid-May, our volunteers found that Office Depot had the shortest turn-around time of the larger vendors and they do allow in-store pickup of lawn signs.
